

Family Emergency Response Plan

EMERGENCIES TO PLAN FOR

Emergency preparedness starts with

be prepared

YOU

make a plan

build a kit

stay informed

**VITAL Things
To Discuss With Your Family NOW**

BEFORE
a Disaster Ever Happens

**Then
DO
It
NOW**

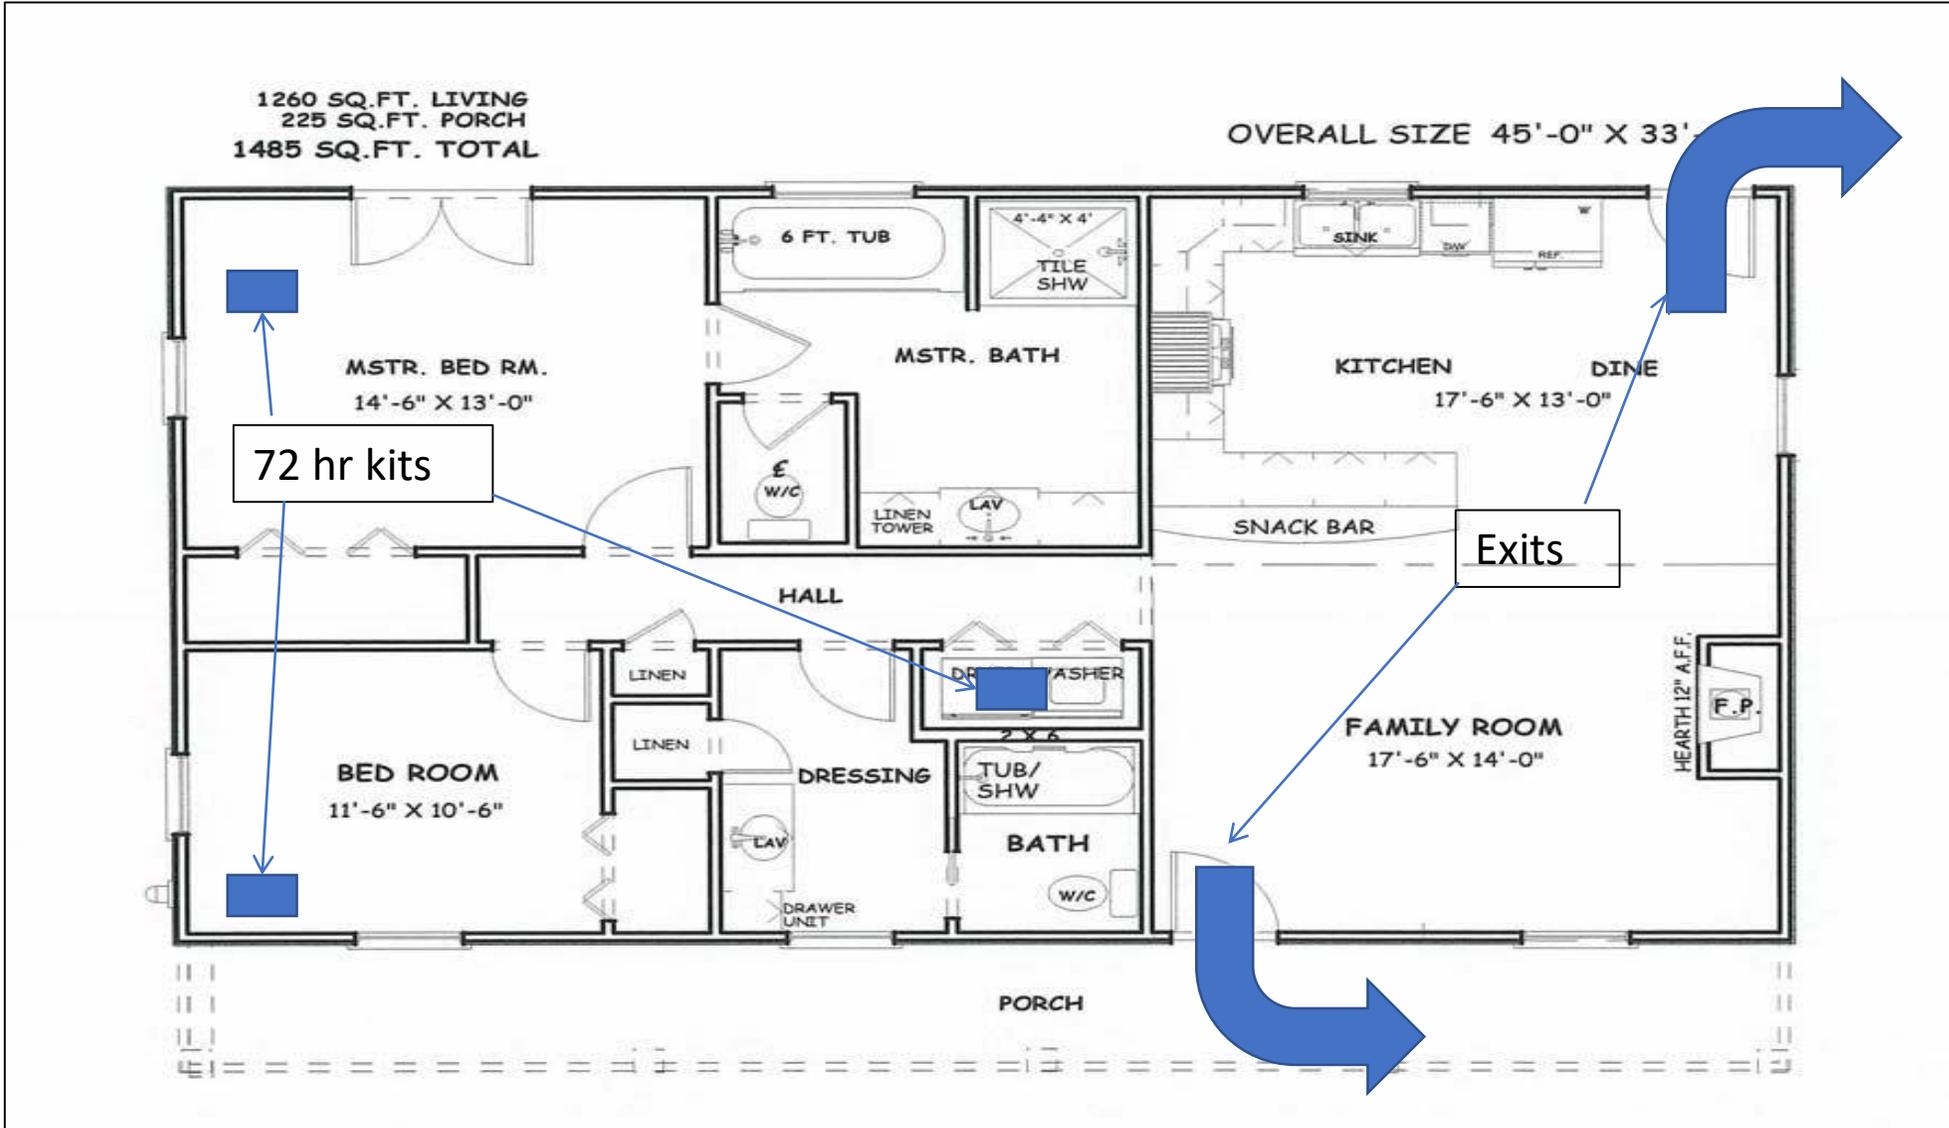

Things to do and discuss

Things to Discuss	Things to do
How to escape out of the house in an emergency	Draw a plan of the house with exits
What to do before you leave the house	Everyone is counted for. Turn off Power, water and Gas Leave a note where you are going to be. Check on neighbours and pets.
What to take with you when you leave the house	72 hour pack/grab a bag. Supplies for elderly, babies and pets
Plan where you will go.	The Plan of where you will be
Who will be your contact people	List of contact people
Emergency contacts	List of emergency contact people/groups
What will you do if you can not leave the house	Listen to Radio/check food supply/check house is safe. Check on neighbours
What Event to prepare for	List Events e.g. flooding, earthquakes etc
What to do BEFORE:DURING and AFTER the Event	List <u>what to do</u> can be found on the Civil Defence Site

Discuss
and
draw
an
Evacuation
plan

House Plan: Draw house floor plan with exits and where to meet plus location of 72 hour kits

What to do before you leave your House in an Emergency

Who will do what.

- 1: Turn off Power, water and Gas
- 2: Check everybody is ready to go
- 3: Inform people where you are going
- 4: Check on neighbours
- 5: Other

What to take when leaving the House in an Emergency

Who and when will these be checked

- 1: What should be in your 72 hour pack/Grab a bag
Food / water/ warm clothing/ warm foot wear/ radio/
shelter, personal items.
2. Supplies for Elderly/Babies and Pets
3. Check on neighbours

Plan Where will you go in an Emergency

What will you do if can not leave your house in an Emergency

Who will

1. Listen to the radio for information
2. Check your food and water supplies
3. Check if the house is safe and sound.
4. Inform someone about your situation.
5. Check on neighbours
6. Check if everyone is ok

EMERGENCIES to Plan for

Flooding :is dangerous an can cause injury , loss of life, damage to buildings and roads, and contaminate water.

Earthquake: Most injuries in an earthquake is caused from falling objects. like furniture, glass, and building materials'

Storms: Major Storms affect wide areas and can be accompanied by strong winds, heavy rain , snow, thunder and lighting and tornados.

Landslides: Heavy rainfall and earthquakes can cause landslides. SO can tree removal and leaking pipes.

Tsunami: Is caused by an earthquake that can cause a wave of destruction to occur that can kill and do major damage.

Volcanic Eruption: New Zealand is sitting on a geographic belt known as the ring of fire encircling the Pacific Ocean and contain about 90% of the worlds volcanoes

Other events to consider Pandemics, Droughts, Fires, Hazardous substance etc.

To Prepare for Emergencies we should dicuss as a family three important issues

1. What should happen before an event happens
2. What should happen during an event.
- 3, What should happen after an event.

Example Emergency response Plan : Earthquake

Before the Emergency:

Make a plan what to do, and where you will go after the event.

Get together 72 hour kits/ Grab a bag, Radio, Shelter

Have a least 3 months of food and water stored, extra clothing and if possible extra finances

Practice DROP, COVER, HOLD

Supplies stored for Elderly, Babies, and Pets

Check to see if your house is safe to be in.

During the Emergency :

if you are indoors DROP , COVER HOLD. Stay indoors until the shaking stops and its safe to leave.

If you are outside move away from buildings, trees and power lines, then DROP , ROLL & Hold until the shaking has stopped.

Turn off power and gas utilities.

After the Emergency

Listen to the Radio for guidance and information

Listen to Emergency Responders directions

Check yourselves and other s for injuries, get/give first aid if needed.

Check neighbours are OK

Watch for broken gas lines and fallen power lines, stay out of damaged areas.

Be mindful of after shocks

Head for planned meeting safe area

Emergency preparedness starts with you
be prepared

make a plan

build a kit
